

RUDY HAMAME

International Medical Graduate | Healthcare Technology Developer

Scarborough, ON | 416-543-3399 | rudyhamameca@gmail.com | Canadian citizen | mctoshs.ca

PROFESSIONAL PROFILE

Medical graduate with clinical observership and hospital training across internal medicine, surgery, pediatrics, obstetrics and gynecology, and emergency medicine. Combines patient-centred communication, clinical reasoning, and operational awareness with hands-on full-stack development of AI-assisted healthcare learning tools. Seeking clinical research, healthcare operations, medical education, or healthcare technology roles while preparing for postgraduate medical training in Canada.

CORE COMPETENCIES

- Clinical communication and history-taking
- Clinical documentation and data entry
- Clinical reasoning and case synthesis
- Hospital and multidisciplinary workflow awareness
- Patient-centred support and communication
- Full-stack web development (React, Node.js, MongoDB)
- AI-assisted document extraction and chat interfaces
- Healthcare education product development
- UX, prototyping, and product ownership
- Arabic (native) and English (professional working proficiency)

CLINICAL TRAINING AND HOSPITAL EXPOSURE

Internal Medicine Observership - Lattakia University, Latakia, Syria

Sep 2024 - Sep 2025

General Internal Medicine wards

- Shadowed attendings and residents during ward rounds and inpatient assessments; observed diagnostic reasoning, case presentations, management planning, discharge processes, medication reconciliation, and multidisciplinary coordination.

Surgery Observership - Lattakia University, Latakia, Syria

Sep 2024 - Sep 2025

Operating room and perioperative workflow

- Observed surgical procedures, pre-operative assessment, intra-operative protocols, post-operative handover, perioperative safety practices, and team coordination.

Pharmacy Assistant Training - Community Pharmacy, Prince George, BC

Jan 2018 - Mar 2018

- Supported supervised prescription processing, labeling, inventory organization, documentation, and patient-facing guidance in a community pharmacy setting.

HEALTHCARE TECHNOLOGY AND RESEARCH PROJECTS

MCTOSHS Project - Lead Developer and Product Owner

Sep 2020 - Present

Clinical learning platform | mctoshs.ca

- Designed, built, and deployed a case-based clinical learning platform that helps medical students distinguish patient processes from diagnostic concepts and strengthen clinical reasoning.
- Developed AI-assisted extraction and chat workflows for PDFs, lectures, and clinical texts, including server-sent-event streaming interfaces.
- Built the full-stack application using React, Vite, Node.js, Express, MongoDB, TypeScript, JavaScript, HTML, and CSS; integrated OpenAI, Groq, Ollama, and Gemini providers.
- Led product direction, user experience decisions, feature prioritization, and prototype-to-deployment workflow.

EDUCATION

Doctor of Medicine (MD) - Faculty of Medicine, Lattakia University (formerly Tishreen University), Syria

Sep 2013 - Dec 2025

- Completed medical education and clinical training across internal medicine, surgery, pediatrics, obstetrics and gynecology, and emergency medicine, including history-taking, physical examination, diagnostic reasoning, and clinical decision-making.

Computer Science Coursework - York University, Toronto, ON

Sep 2020 - Aug 2021

- Completed coursework in discrete mathematics, calculus, programming, and mathematical logic.

Biomedical Sciences Coursework - York University, Toronto, ON

Apr 2019 - Aug 2021

- Completed foundational coursework in biology, general chemistry, and organic chemistry.

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Web Developer - Healthcare Education and Clinical Workflow Projects

Jan 2022 - Present

- Design and develop responsive full-stack web applications and prototypes, including frontends, REST APIs, backend services, databases, testing, deployment, and maintenance workflows.
- Translate user needs into practical product requirements, interface design, documentation, and iterative features for healthcare education and clinical-workflow use cases.
- Develop AI-supported document-processing and conversational interfaces to improve access to complex educational content.

Team Leader - Wendy's, Prince George, BC

Feb 2019 - May 2021

- Led frontline shift operations in a high-volume environment; coordinated team tasks, supported onboarding, maintained service standards, and addressed customer concerns.
- Managed cash-handling, inventory-related tasks, food-safety procedures, and operational priorities while working collaboratively under time pressure.

Team Member - Mary Brown's, Hamilton, ON

Dec 2018 - Feb 2019

- Provided customer service, supported food preparation and cleanliness standards, and worked reliably within a fast-paced team environment.

Team Member - Karma Candy, Hamilton, ON

Nov 2017 - Jan 2018

- Supported production and packaging activities, maintained organized work areas, and contributed to quality and safety procedures.

ADDITIONAL INFORMATION

Technical: React, Vite, Node.js, Express, MongoDB, TypeScript, JavaScript, HTML, CSS, REST APIs, AI provider integration, PDF and document workflows.

Recognition: Lifetime Member, Golden Key International Honour Society (inducted October 2019).

Other: Ontario Class G Driver's Licence.
